**RE: Notice of Road Closure and Change in Access**

Good morning:

On or about Wednesday, August 21, 2024, Earth, Inc. plans to begin construction activities on Mann Street from Lincoln Ave to CTH E in the Town of McMillan. At this time, traffic control will be placed to restrict through traffic, with a 25-mph maximum speed. Erosion control will then be placed in the right-of-way, which will not restrict traffic access. After erosion control is placed, grading and excavation operations will begin, at which point access to Mann Street from Lincoln Ave to CTH E will be restricted to one lane for local traffic and emergency vehicles only.

Earth, Inc. will access Mann Street with construction vehicles from the east (CTH E), and reconstruction of the road will begin on the west end at Lincoln Ave and progress eastward toward CTH E. One traversable lane will be open for access to Earth, Inc., local residents, and emergency vehicles during construction.

We require all local traffic or those requiring access to this portion of the roadway to maintain speeds of 25-mph or less.

Thank you,

The Team at Earth, Inc.
